As has been mentioned on previous pages, the A320 was the second commercial aircraft to use "Fly by Wire" technology, after Concorde. This system of digitised flight control systems, allows the pilot to input to the control surfaces using a side control joystick, as opposed to the accepted quadrant method with a joystick or half wheel located in front of the pilot.

The A320 Family is the most successful aircraft family ever and it was born ambitious. As the first civil aircraft to pioneer fly-by-wire technology, it has set the standard ever since its arrival and, thanks to significant annual investment of 300 million euros, the A320 Family continues to innovate.

**A320 Family - Passenger aircraft - Airbus**  
The Airbus A320 seems to be still the airliner to challenge developers. Whilst we have seen in previous years a splattering of versions for both F59 and FSX, it appears 2012 is the year things begin to change.
