Build Apis You Wont Hate
API development is a topic very close to Phil 's heart. APis You Won't Hate started out as a book, with Phil pouring everything API related he knew, all the problems he faced, all the design decisions he wish he thought about earlier. Since the book, Phil has continued to learn and grow, thanks to new experiences, and new conversations with really smart people.

"Build APis You Won't Hate" on LeanPub Some chapters are just theory, and some chapters will have sections that rely on sample code. I have tried to avoid making this a book of code, and it's intended to be language agnostic, but a book without any concrete examples would just be a hand-wavy joke.

GitHub - apisyowonhate/build-apis-you-wont-hate ...
These are general approaches to building APis, but not a specific tool or specification. They are merely a concept, not a tangible thing. Implementations are something you can actually download, install, and use to build an API, that conforms to whatever rules the implementors picked, from whichever paradigms they wanted to use at the time.

Build APis You Won't Hate by Phil Sturgeon
Build APis That You Wont Hate: Part 1 - Useful Database Seeding. A little while back I produced an article called Building a Decent API which was mostly a tongue-in-cheek list of things that I'd come across in other APis that pissed me off, or that I had done myself and used my super-power of hindsight combined with sarcasm to make a set of rules for you to live by when building APis.

Build APis That You Wont Hate: Part 1 - Useful Database ...
Build APis You Won't Hate throws away all the academic nonsense and instead focuses on the real-world usefulness of API development. It emphasises a pragmatic and honest approach to solving API problems for modern applications. Phil's comedic attitude to the subject emphasises this whilst still being serious and very useful. It's a delight to read.
