In this review we cover the classification and endovascular management of arteriovenous malformations (AVMs). We begin by viewing AVMs in relation to the broader class of congenital vascular malformations and subsequently go into more depth on the clinical and pathologic characteristics that define AVMs.

Article - Peripheral arteriovenous malformations ...

Arteriovenous malformations (AVMs) usually manifest as headaches, seizures, focal neurological signs, and spontaneous intracerebral or subarachnoid hemorrhages. An untreated AVM with associated cyst formation is extremely rare, and the probable pathogenesis is unclear. We propose and discuss the pos ...
