CRACKING YOUR GENETIC CODE ANSWER KEY

cracking your genetic code ANSWER KEY.docx - Google Drive

It now seems certain that the amino acid sequence of any protein is determined by the sequence of bases in some region of a particular nucleic acid molecule. Twenty different kinds of amino acid are commonly found in protein, and four main kinds of base occur in nucleic acid. The genetic code describes the way in which a sequence of 20 or more things is determined by a sequence of four things ...

Can Crick crack the code? | Science in the Classroom

Nirenberg and Khorana used RNA sequences to crack the code; in contrast, this activity uses DNA sequences (sense codons, 5' to 3'). The crux of the activity is the existence of the code rather than the details of transcription and translation, which can be addressed in subsequent lessons.
