Beginning from the theories of Euclid and Archimedes on the topic, he brought them to the state they were in just before the invention of analytic geometry. His definitions of the terms ellipse, parabola, and hyperbola are the ones in use today. Apollonius worked on many other topics, including astronomy.

### **Apollonius of Perga - Wikipedia**

Apollonius of Perga refined and consolidated some of the previous findings of Archimedes and Euclid, hence making them more complete, and added his own contributions, especially in geometry. His...

### **The mathematics of Euclid, Archimedes and Apollonius**

According to them the Elements were originally written, not by Euclid, but by a man whose name was Apollonius, a carpenter, who wrote the work in 15 books or sections. In the course of time some of the work was lost and the rest became disarranged, so that one of the kings at Alexandria who desired to study geometry and to master this treatise in particular first questioned about it certain learned men who visited him and then sent for Euclid who was at that time famous as a geometer, and ...

### **The Thirteen Books of the Elements, Vol. 1 by Euclid ...**

Besides his edition of Euclid's Elements, his publications included editions of the surviving works of Archimedes and Apollonius, and influential histories of Greek mathematics and astronomy. In 1925 Heath produced a second edition, 'revised with additions', of the Elements.

Other works are credibly attributed to Euclid, but have been lost. Conics was a work on conic sections that was later extended by Apollonius of Perga into his famous work on the subject. It is likely that the first four books of Apollonius's work come directly from Euclid.

### Euclid - Wikipedia

Euclid Euclid meant that all mathematical statements should be proved (Euclid's Elements) Alongside Pythagoras, Euclid is a very famous name in the history of Greek geometry. He gathered the work of all of the earlier mathematicians and created his landmark work, 'The Elements,' surely one of the most published books of all time.
