failure of his alternator on his Volvo VNL780.

This was his replacement steps. Here is a picture of my nice pretty new alternator. The old one was a model 34SI, which has been superseded by the 35SI. The 35SI, while still in production, has also been superseded by the 36SI.

The alternator belt has installation instructions in the manual (torque to 70nm)(Put 1/2 torque wrench on it.

There is a square hole in the bracket). I think the bolt was 50nm.

Hope that helps. IMHO - It is something you could replace in open seas but a visual inspection occasionally would tell you of any impending peril.
