ADC also sum to  $180^\circ$ .

Thus, the total sum of these angles (which is actually equal to the sum of the four angles of the quadrilateral) is  $360^\circ$ . Formally: In

$(\Delta ABC)$ , we have:  $(\angle ABC) + (\angle BCA) + (\angle CAB) = 180^\circ$ .

Similarly, in  $(\Delta ADC)$ , we have:

$(\angle ACD) + (\angle CDA) + (\angle DAC) = 180^\circ$

**Quadrilateral  
Worksheet |  
Teachers Pay  
Teachers**

The sum of the interior angle measures of a quadrilateral (four-sided polygon) is 360 degrees. Therefore, the sum of 108, 101, 76, and  $k$  is 360. You can set up an equation and solve for  $k$ . The correct answer is Choice (E).
