Patterns are a useful resource for website design. Filling the background with a full-blown image is no longer a useful solution today as the variety of devices and screen resolutions in the market make it difficult to adapt to them all, although it is true that the latest plugins and scripts offer solutions such as automatic image resizing.

Patterns and textures, as part of your website design, are a very simple structure to use. Like everything crafted by designers, the use of patterns is helpful for improving the conversion rates of the site, increase the level of usability, the overall presentation of the company on the internet, etc. There is a pretty large selection of patterns available for web and graphic design.
