Weaning Nhs Grampian
Weaning is a time for babies to learn to enjoy food. It is also a time to think about the balance of foods for your baby’s health now and in the future. The foods your baby learns to eat now can have a big impact on how healthy a child and adult they become. The supporting leaflet “Weaning - What foods? When? How much?” will also help you.

Introducing your baby to solid foods, also referred to as weaning or complementary feeding, starts when your baby is around 6 months old. Your baby should be introduced to a varied diet, alongside their usual breast milk or first infant formula. It can be confusing knowing when and how to start introducing solid foods.

For non- breast fed children, a cow’s milk free formula should be used. If the child is on mixed feeding, i.e. breast and bottle fed, a cow’s milk free formula should be used. If symptoms only occur on introduction of top up feeds with formula then the mother does notneed to exclude milk from her own diet.
